DecomX

Geoactive

P&A **Decision** Support Tool

DecomX

is a decision-support tool that streamlines the process of proving ALARP for well decommissioning activities. By automatically generating alternative designs, validating compliance in real time, and comparing options against risk, cost, time and operational exposure, DecomX helps engineers make informed decisions faster.

For Engineers

- Faster design building
- Less repetitive option-building and document assembly
- Standardised approach to Compliance and ALARP
- Better Campaign Optimisation
- Rapid turn around on Operational decisions

For Operators

- Standardised Compliance and ALARP approach
- Reduced P&A risk
- Easier integration with Regulators
- Encode best practice and lessons learned safeguarding knowledge
- Record of decisions and responsibility held centrally for auditability

For reviewers, examiners and regulators

- A clear record of the options considered, the compliance position and the basis for the decision
- Faster, easier approval processes
- Standardised reporting and auditing tools

DecomX makes the work behind an ALARP case

visible, **repeatable** *and* **defensible**.

DecomX

Geoactive

WHAT MAKES DECOMX DIFFERENT

- Live well status diagram, not spreadsheets and Word docs.
- ALARP alternatives across cost, risk and duration in seconds.
- Compliance on every change: regulatory and internal rules simultaneously.
- Wells grouped into campaigns with vessel scheduling.
- Ops decision tree on the rig: contingencies pre-modelled.
- One PDF export not assembled from multiple sources.
- Time per well: weeks -> hours.

KEY BENEFITS

- De-risk decision making that is demonstrable.
- Accelerates, more defensible risk decisions.
- Audit trail in one place; every version, finding, and decision retained.
- Consistent comparisons sets across every well in the portfolio.
- Browser-based, no installation, onshore and offshore on the same designs.
- Your cloud, our cloud, or a laptop.
- Templates and duplication; portfolio knowledge accumulates.
- Engineering judgement stays with you.

MANUAL VS DECOMX

AREA	ALARP	Compliance	Campaigns	Submission	Time / Well
MANUAL	**Days, hand-built**	**End of process**	**Spreadsheet**	**Multiple Sources**	**Weeks**
DECOMX	**Seconds**	**Every change**	**Scheduled + ALARP**	**One PDF export**	**Hours**

*What **DecomX** Delivers*
