

Trusted petrophysics consultancy services delivering value across any asset base

Geoactive Insights

Geoactive has a long-standing track record of delivering and supporting world-class petrophysics software, backed by industry-recognized experts. Today, that same depth of knowledge is available to support every stage of your oil & gas and energy transition projects - from exploration to production, from early appraisal through to ultra late life management, decommissioning and in to repurposing and alternative energy opportunities. Whether it's strategic planning or tackling complex technical challenges, our team is here to help you unlock maximum value across your asset's life cycle.

We are the local company that is available globally; with our experts ready to listen and respond to your challenges in your own back yard. Using our industry-leading software; **Interactive Petrophysics and Interactive Correlations** we can help you to make informed decisions that add real value to your assets and projects.

Our leading industry experts bring over 200+ years of combined industry experience that you can access. With experience in geomechanics and NMR to cased hole analysis, acoustic waveform processing, data management, and custom UserApps, our specialists work alongside subsurface and wells teams to enhance decision-making and unlock greater value at every stage.

Our **Geoactive Insights** consultancy is built on a foundation of trusted expertise and efficient delivery - backed by decades of hands-on experience across the global energy sector.

- **Deep Industry Expertise** – Our consultants bring proven insight from international oil & gas projects, as well as cutting-edge energy transition initiatives like hydrogen reservoirs and carbon capture, usage and storage (CCUS).
- **Technology-Driven Analysis** – Leveraging our proprietary tools, IP and IC, we deliver high-resolution, actionable results.
- **Tailored to You** – Every project is shaped around your reservoir challenges and strategic goals for maximum impact.

Whether you're evaluating new opportunities, optimizing production, or planning asset decommissioning, Geoactive brings the clarity and confidence your team needs. So, let's talk about how we can support your next decision.

I've have worked globally in technical and management roles delivering across the EP&D value chain. From petrophysical and geomechanics technical work to managing subsurface delivery of exploration, production, decommissioning and reuse projects and firmly believe Geoactive have the experience and insights that will help you to add value to your projects.

Derek Littlejohn,
Geoscience Manager

Unmatched Experience - With over 200 years of combined industry expertise, our team has a proven record of delivering measurable value across the energy sector.

Trusted Partnership - Renowned for our integrity and know-how, we bring critical petrophysical insights that support confident, high-impact decisions.

Global Presence, Local Understanding - With offices in key regions worldwide, we're always close by - ready to engage in-person and gain a deep understanding of your unique challenges.

Powered by Industry-Leading Technology - As the creators of IP and IC, we don't just use the tools - we build them. That gives us the edge in delivering efficient, high-resolution results.

People-First Approach - We're open, collaborative, and genuinely invested in your success. Clients value our creativity, empathy, and the pride we take in being great teammates.
